OSHA SAFETY TRAINING: A CREDENTIAL OF VALUE

OSHA training is one of the strongest foundations we can offer students in preparing for the workplace. OSHA 10-Hour credentials are:

- **Industry-recognized** — OSHA credentials are aligned with real workplace expectations and regulations across all industries.
- **Validated by employers** — Businesses routinely require OSHA training for hiring at all levels, and high-growth industries consistently prioritize OSHA-trained workers.
- **Portable and stackable** — OSHA 10-Hour credentials are portable between industries and across states and are a key value-add credential when stacked with other technical industry certifications.
- **Transparent in outcomes** — Learning outcomes in the OSHA 10-Hour courses directly support state and federal safety learning standards and are directly tied to the credential assessment.
- **Supported by data** — Employers, industries, and educators consistently report improved readiness, professionalism, and safety mindset among students with OSHA 10-Hour credentials.

What's a Credential of Value?

A credential of value is one that **meets essential criteria for influencing student outcomes and workforce readiness** — and OSHA credentials check all the boxes!

They're not only recognized, but also relevant, rigorous, portable, and impactful.

THE CAREERSAFE DIFFERENCE

CareerSafe Courses are 100% online, on-demand, and easily integrated to support your current safety program. This means students can learn on their own schedule, in whatever environment works for them, and at their own pace.

What sets us apart from other OSHA-Authorized Online Training Providers?

- ✓ **Career Pathways:**
